FCC MAIL ROOM

April 20, 1993

Federal Communications Commission
Attn: FCC Docket 92-235
1919 M St. NW 222
Washington, DC 20554

Dear Sirs:

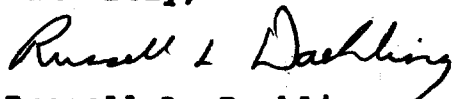

I would like to address the new regulation which would limit radio frequencies available to local governments for the two-way communications and limit the power of their base stations.

If these regulations will be implemented in their present form, this will cause major disruption to our current county radio communications systems and will necessitate a complete replacement of our radio systems in the future.

The other problem entering into this is the industry does not currently manufacture equipment capable of meeting these proposed regulations. Many of the public service radio systems will require complete replacements at enormous costs if the new regulation is approved. Counties like ours in the rural situation in Nebraska will be put at an extreme disadvantage.

Should you have any questions, feel free to call or write the above address.

Sincerely,

Russell L. Daehling
Highway Superintendent
